

Versuche mit den Zahlen im Ballon das Ergebnis in der Gondel zu bilden.
Verwende dabei jede Zahl nur einmal.
Du darfst $+$, $-$, $:$, \cdot rechnen.

zum Beispiel:

$$(7 + 8 + 1) \cdot 9 : 9 = 16$$

$$10 : (1 + 6 : (5 + 1)) = 5$$

$$(11 + 15 : 3) + 10 - 20 = 6$$

$$18 + 3 + 11 - 12 - 12 = 8$$

$$16 - 4 - 10 + 24 - 25 = 1$$

$$(7 + 17 - 17) : (14 - 13) = 7$$

$$9 \cdot (4 : 2) + 9 - 5 = 22$$

$$7 - 6 + 3 - 10 : 5 = 2$$

$$(2 + 2) \cdot 6 - 17 + 1 = 8$$

$$10 + 4 + 11 - 11 - 9 = 5$$
